### Full job description

Your new company

Demand for high quality structural steel is continuously growing and my client who is one of Australia's biggest and most advanced steel fabricators is looking for highly skilled special class welders & boilermakers to join their team with the opportunity to go permanent.

Your new role

You will working in one of Australians most advanced and largest workshops, responsible for the welding and fabrication of structural steel, reading shop drawings and complying with the high quality standard of the company. Overall you will be welding specialised structures for major railway projects, major scale bridges including the west gate tunnel, major shutdown projects and so much more. This is a very exciting opportunity for top quality special class welders looking to join a rapidly growing and successful company long term.

What you'll need to succeed

You will have a high work ethic and an interest in continuing to build upon your skills, you will have;

- Strong ability to confidently weld in confined spaces and from all positions
- Experience in welding heavy structural steel
- Strong ability to read plans/drawings
- Basic hand tools
- Strong focus on attention to detail
- Strong ability to stay productive whilst working autonomously

What you'll get in return

Join and grow within a successful company where you can utilise your skills/experience. Our client is willing to pay above the market rate for the right boilermakers to join their team. They are proud of their quality products and look after their staff ensuring your hard work will not go unnoticed.

What you need to do now
